

"...I had been getting Double Peels for several weeks in a row and finally decided to step up to the Triple Peel. After everything peeled, I looked several years younger."

Triple Peel™

This is the famous **Amazing Triple Peel FaceLift**. It consists of an **AHA Power Peel**, Plus a **PowerDerm Kinetic Dermabrasion**, Plus a **Chemipeel™**. You get the benefits of each of these three in succession, giving you an unparalleled experience of renewal. We start this series of peels by dissolving skin cell connective strands with our Alpha-Hydroxy Acid Peel treatment, followed by deep resurfacing in the second peel with the Patented PowerDerm Kinetic Dermabrasion Peel treatment. The third and final peel is the ChemiPeel™ treatment, in which a light acidic solution is applied one layer at a time until the skin “frosts”, indicating completion. The Triple Peel is safe, reliable, and easily our most dramatic peel when finished, taking off years of skin cell “memory” that has hidden your youthful skin. The result is clear, bright, lifted, collagen enhanced, and youngest looking skin possible. The Triple Peel can be repeated every 6 weeks.
